

Ideation Phase

Empathize & Discover

Date	1 July 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

Empathy Map

Example: Food Ordering & Delivery Application

Project Details - Credit Card Approval Prediction Using Machine Learning

Project Name: Credit Card Approval Prediction Using Machine Learning

WHO ARE OUR USERS?: Bank Managers, Credit Analysts, Credit Card Officers, Financial Institutions, Credit Card Applicants

SAYS: I need faster and fair credit approval decisions. Manual verification takes too much time.

THINKS: Can the applicant repay? Is the applicant financially stable? Can ML improve decision accuracy?

DOES: Collects applicant information, verifies documents, reviews credit history, approves/rejects applications.

FEELS: Needs reliable predictions, wants to reduce workload and financial risk.

PAINS: Manual processing, inconsistent decisions, long approval time, human errors, financial risk.

GAINS: Fast approvals, improved accuracy, reduced effort, consistent decisions, better customer satisfaction.
